

MY NEWS

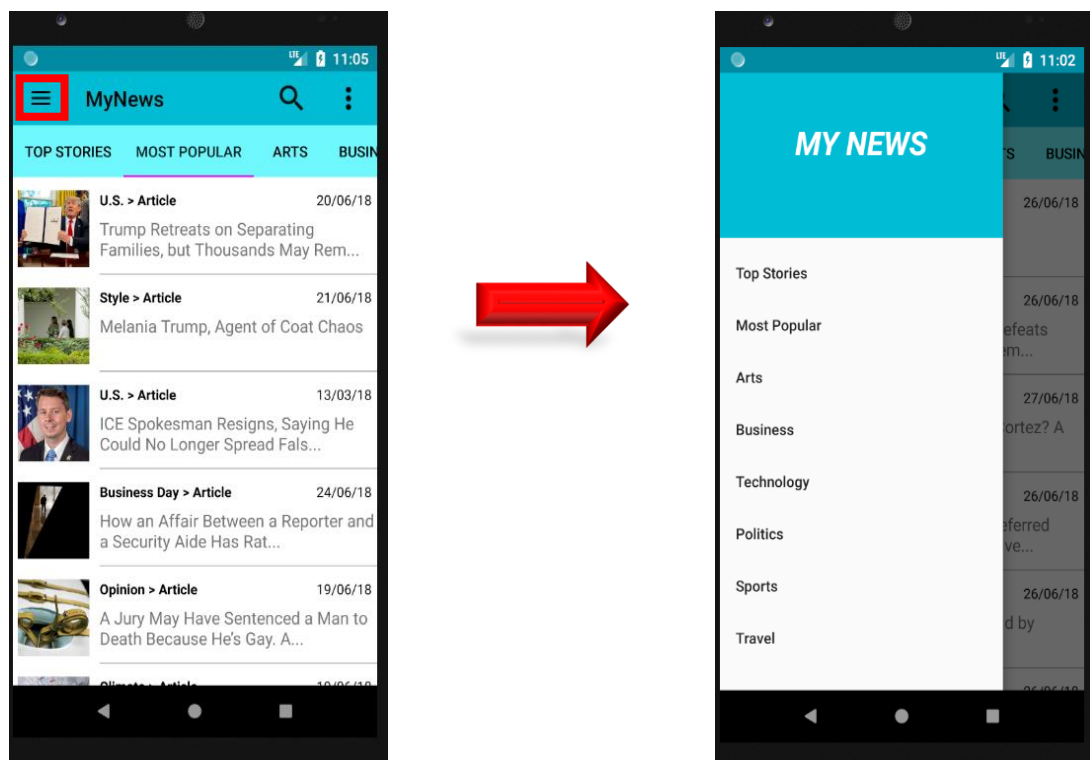

What is MY NEWS ?

MY NEWS is a native android application. It allows to consult publications from the New York Times by different sections like Top Stories, Most Popular and so on. Moreover you can search specific articles with the article search engine, and if you subscribe, you have the possibility to read articles. Finally, notification settings can be activated with key words one time every days.

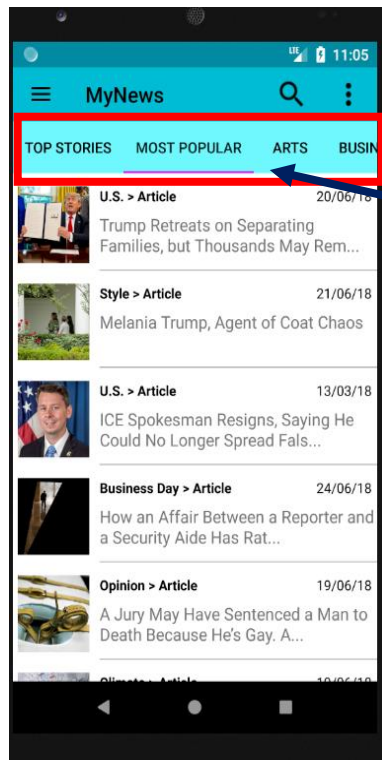

How to navigate ?

In order to navigate inside, you have three possibilities:

1°) with the NavigationDrawer:

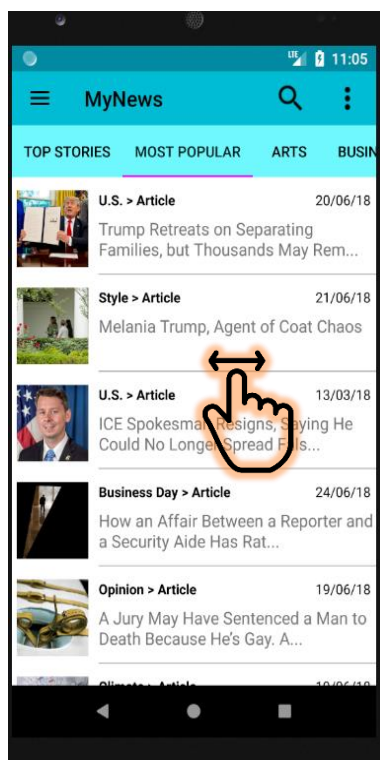

2°) with the clickable scroll TabLayout:

You have a pink indicator in order to localise the current section viewed.

3°) Scrolling the ViewPager with horizontal finger motion:

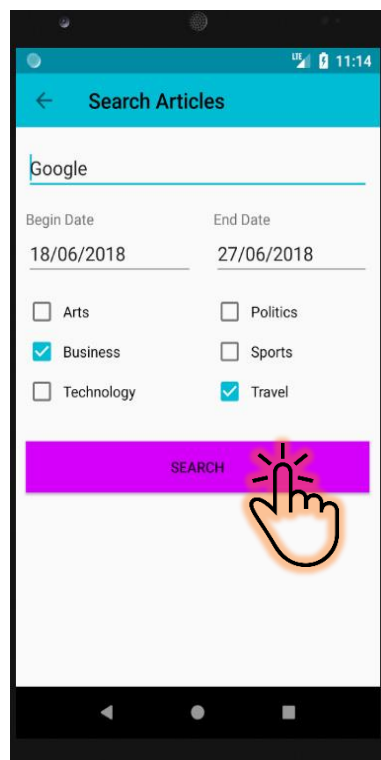

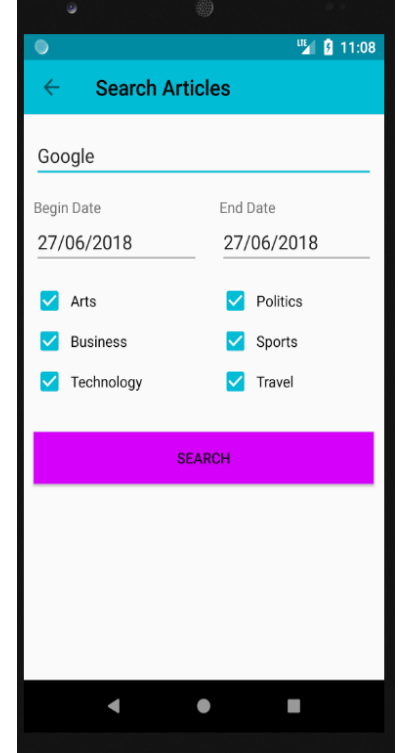

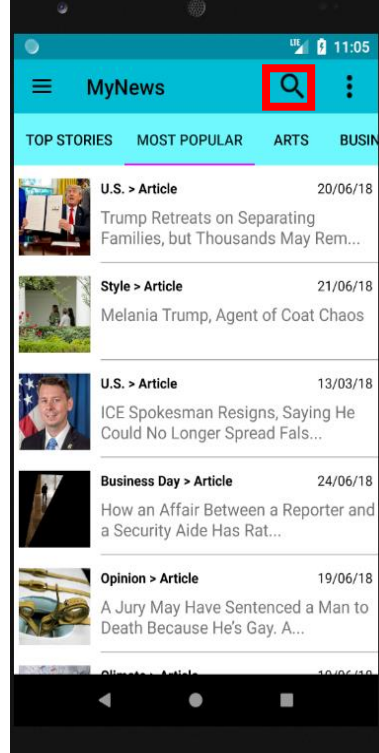

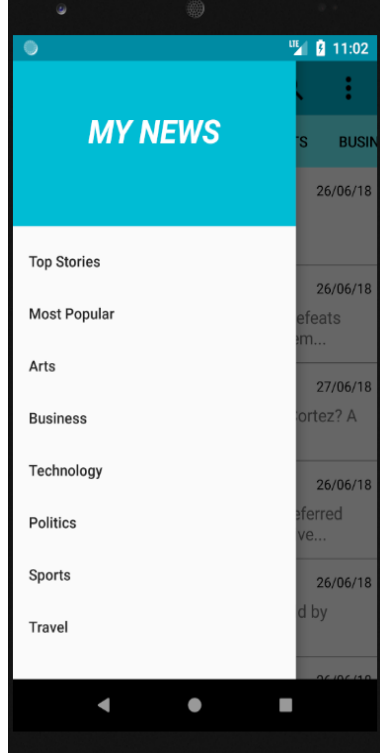

How can I customize my TabLayout and my NavigationDrawer ?

It's possible to customize your TabLayout and your NavigationDrawer by using .

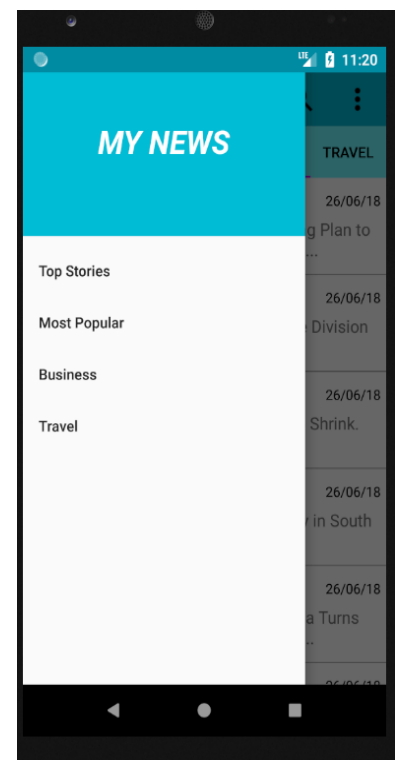

With this one, you can hide or show the different sections. Launch a search, and your TabLayout menu will be immediately updated.

Ps: The customisation is strictly the same between TabLayout and NavigationDrawer.

Ps 2: You don't need to have a positive search to validate this change.

NavigationDrawer

How to find specific articles into a defined period ?

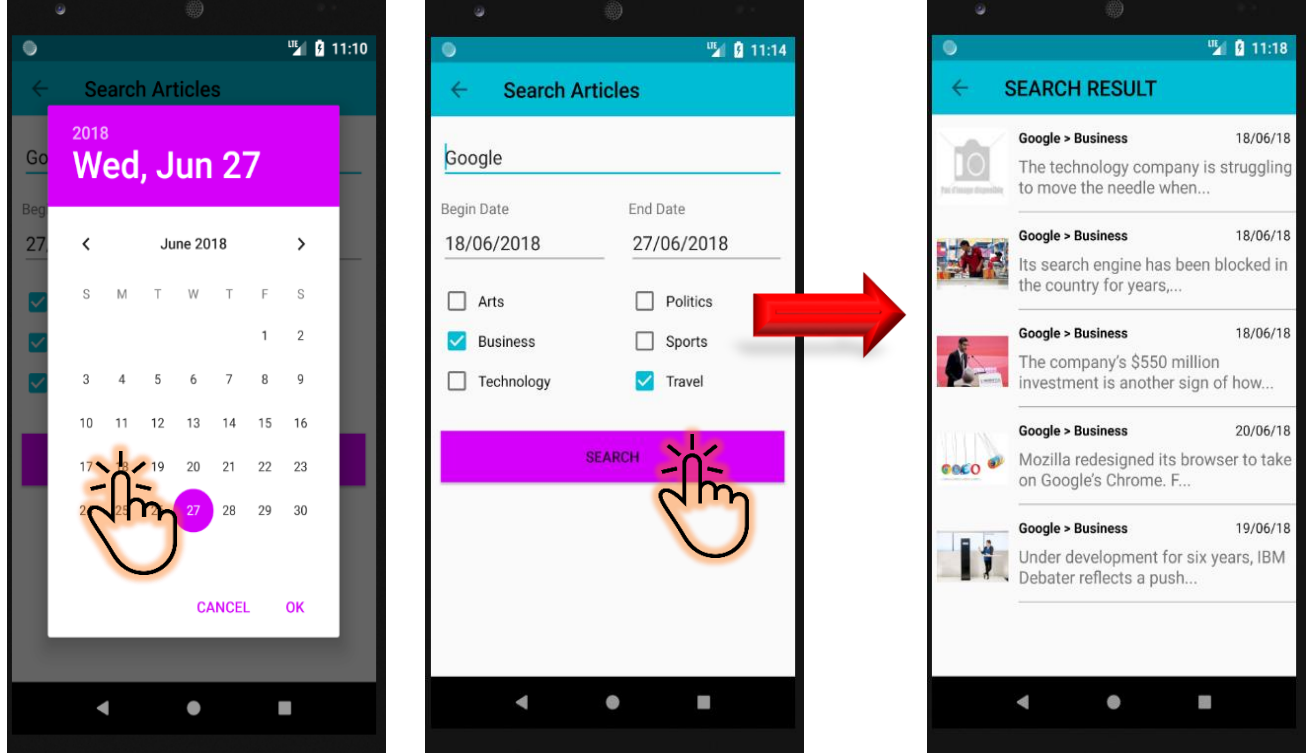

To start a search use 🔍.

Be sure to write a key word into the EditText and check one box (the minimum) in order to permit to the search button to be clickable.

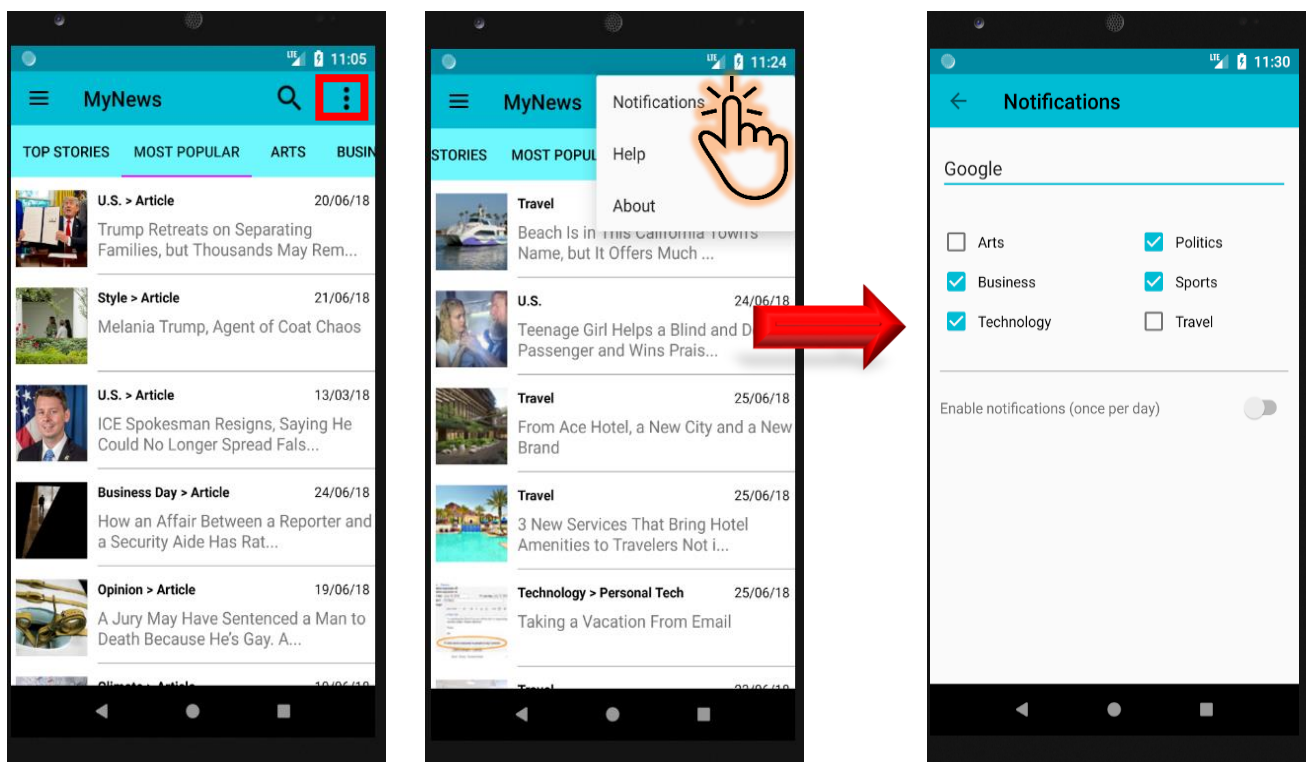

Choose a begin date and an end date to define the range of publications date article.

WARNING : A similar date between begin date and end date will send a null result.

For new articles, use this parameters : begin date (yesterday) – end date (today)

Where I can find notification menu ?

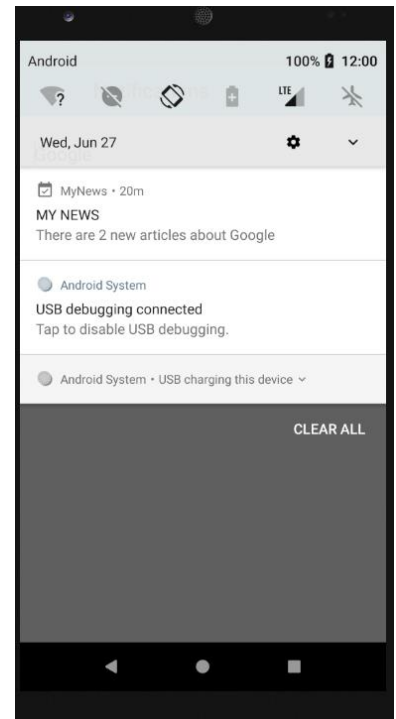

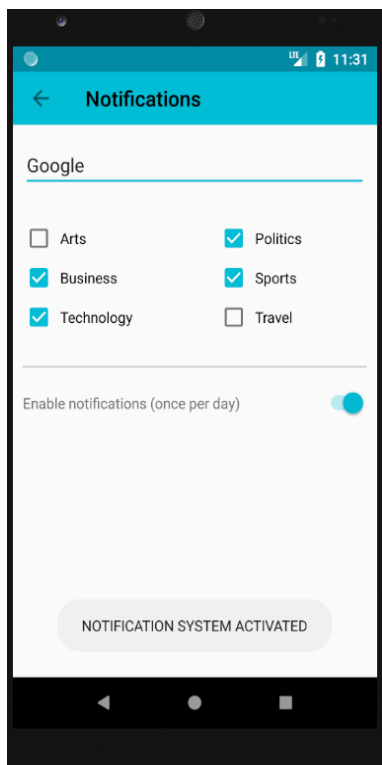

How to create and configure notifications

First, you must write a key word into the Edit Text and check one box as well in order to get the switch button enable.

When the switch button is on, you will receive notification if new articles are published only according to the notification configuration. Notifications system is locked to 12:00 AM every day.

Ps : If you change parameters when switch is on, this one automatically switch off. That's why, after each change, switch on again.

ENJOY...
